

Parkland Photography Club

Theme Shoot Entries

Proposed Guidelines

1. The theme shoots for the next year are decided at the May club meeting. All entries in theme shoots for the next year must be taken AFTER the May meeting.
2. Basic editing may be used on the images. This includes:
 - Cropping
 - Straightening
 - Exposure
 - Contrast
 - Colour

Note: These are done to the entire image.

These must be adjustments that you did yourself.

3. You may not:
 - spot-edit your image
 - use any editing tool to create new image areas, objects or features (vignettes, lens flare or motion) that did not exist in your original image.
 - add graphics, clip art, or computer rendered images or parts of other images to your entry
 - add text
 - distort or stretch your image
 - move a subject from one scene and insert it into a different scene, or have it appear in multiple places within a scene
 - create new features
 - clone out incidentals like power lines, twigs
 - apply filters, effects, dodge and burn, or other tools
 - use layers
 - combine captures of different scenes
